THE SUV ENGINEERED FOR EVERY PATH.

For those who demand to live the fullest life, the BAIC B30 is ready to meet you there.

This is a new kind of versatility, powered by the best of both worlds. The B30 range is available with a powerful turbocharged petrol engine and an advanced petrol-hybrid powertrain, designed to master both on and off-road.

POWER OF DESIGN

The B30's design is rugged capability wrapped in a modern aesthetic.

The exterior features a distinctive 5-hole family grille seamlessly integrated with LED light strips, an off-road front bumper, and bold, hard-core lines.

The L-shaped floating roof and scratch-proof design add to its tough style.

Inside, the cabin combines a hardcore design with fashionable style, featuring a cockpit with a sub-instrument panel handler and a fighter jet-inspired electronic shift lever.

THERE'S ALWAYS **MORE THAN ONE ROAD** TO EFFICIENCY.

The BAIC B30's dual-power system is the ultimate expression of force and critical efficiency.

ICE:

Power is rooted in innovation. The standard B30 engine is an award-winning block, jointly developed with German builder, Meta. It's a VGT turbocharger, miller circulation and 350Bar direct injection, delivering performance with advanced emission control and 21-point noise reduction technology.

HYBRID:

For an even bigger surge, the B30e AWD variant delivers up to 301 kW and 685 Nm of torque. This power is comparable to a 3-litre turbo engine, allowing you to accelerate to 100 km/h in just 6.9 seconds and achieve a projected range of over 1 000 km.

KEY STATS

- Max Power: Up to 301 kW
- Max Torque: Up to 685 Nm
- 0-100km/h: 6.95 seconds

MAGIC CORE HYBRID SYSTEM

The B30's unique hybrid system is an intelligent and highly efficient powertrain that seamlessly integrates the engine and electric motors. With six advanced operation modes, it automatically adapts to your driving conditions to optimise power, smoothness and fuel economy.

- **Electric Motor Drive:**
At low speeds, the vehicle is powered by the electric motors alone for quiet, efficient city driving.
- **Series Drive:**
In medium-speed conditions, the engine acts as a generator to power the electric motors that drive the wheels.
- **Engine Drive:**
For high-speed cruising, the engine efficiently drives the vehicle directly, ensuring optimal performance.
- **Parallel Drive:**
During fast acceleration or overtaking, both the engine and electric motors work in unison to provide a powerful, instant surge.
- **Generate Electricity While Parking:**
The engine can be used to charge the battery while the vehicle is stationary.
- **Electricity Regeneration:**
The system recovers kinetic energy during braking or deceleration, converting it into electricity to charge the battery and improve efficiency.

THERE'S ALWAYS **MORE THAN ONE ROAD** TO OVERCOME.

Your journey demands resilience. The B30 is engineered for extreme conditions, having undergone 4,000,000 km of strict real-car testing in temperatures ranging from -35°C to $+50^{\circ}\text{C}$. This ultimate verification ensures vehicle quality and durability.

The All-Terrain System (ATS) offers four intelligent modes: Mud, Sand, Wading and even Snow, with the system automatically controlling energy recovery for optimal performance.

It provides excellent off-road support with a minimum ground clearance of 215 mm, an approach angle of 25° and a departure angle of 30° . The maximum wading depth is 600 mm, with warning information for navigating tricky conditions.

THERE'S ALWAYS **MORE THAN ONE ROAD** FOR THE WHOLE FAMILY.

For maximum utility, the rear seats fold down pure flat, transforming the interior into an almost 1.9-meter bed, ideal for true escapes. Its quiet cockpit tech means a library-grade quiet cabin.

The B30 is designed to support every aspect of your life with more value and utility. The super-sized boot offers 1496 L of space, perfect for the entire family's luggage, fishing gear and campaign equipment.

THERE'S ALWAYS **MORE THAN ONE ROAD** FOR THE WHOLE FAMILY.

The front seats are not only heated but also ventilated, with multi-level adjustment to keep you comfortable in any climate. The driver's seat also features a 3-set memory function and a 'welcome mode' for effortless entry.

Step inside — the B30's bold black interior matches its confident exterior.

THERE'S ALWAYS **MORE THAN ONE ROAD** TO EXPLORE, SAFELY.

The B30 puts effortless control at your fingertips with a 10.25-inch LCD instrument cluster and a 14.6-inch centre screen.

The comprehensive L2 ADAS safety suite provides a full circle of protection, including: Autonomous Emergency Braking (AEB) with pedestrian detection, Blind Spot Detection (BSD), and Lane Keeping Assist (LKA).

Added convenience comes from features like a 360° dynamic 3D panoramic view and rear cross-traffic alert (RCTA).

THERE'S ALWAYS **MORE THAN ONE ROAD** TO CREATE LEGACY.

The most important roads are built on trust. When you choose the B30, you're investing in your own future and in ours. Your B30 is proudly made in South Africa, connecting your choice to a greater legacy.
